

TIL-TEK antennas bring wireless broadband connectivity to the global market — indoors and out

Established in 1979, TIL-TEK is located in the Ottawa Valley. The company also has regional offices across North America, UK, and representation in Latin America

Fast facts Corporate profile

TIL-TEK applications include: broadband point-to-point and point-to-multipoint systems, in-building, WIMAX, cellular, AWS, PCS, public safety, audio/video broadcast, as well as customized applications such as air-to-ground antennas.

Why Ottawa

TIL-TEK's Ottawa Valley home of Kemptville is located approximately 55 km south of Ottawa and 3 km south of the Rideau River. Many of the town's residents take advantage of the Rideau Canal Waterway, a boater's paradise that attracts pleasure boats from across North America to travel its 202 km length. The Rideau Canal is also a National Historic Site of Canada, a Canadian Heritage River and a UNESCO World Heritage Site.

Business advantage

In partnering with TIL-TEK, customers take advantage of a company with extensive R&D expertise, a 30-plus year history in the delivery of off the shelf and customized antennas solutions, and an unmatched industry reputation for reliability.

TIL-TEK Antennae Inc., a wholly owned subsidiary of India's Kaverri Telecom Products Ltd., is a global leader in the design and manufacture of one of the most extensive line up of licensed and unlicensed antenna systems in the industry.

Canada's Creative Economy Capital

Founded in 1991 by a highly innovative team, Bangalore-based Kaverri Telecom designs, develops, tests and implements a diverse range of products, from concept to deployment. With over 150 man-years of R&D experience, the company is uniquely positioned to offer an array of world-class products and solutions to meet all hardware requirements of telecom manufacturers, telecom service providers and telecom users. Kaverri Telecom has been Awarded as the winner of "Deloitte Technology Fast 50 India" for two consecutive year in a row.

TIL-TEK applications include: broadband point-to-point and point-to-multipoint systems, in-building, WIMAX, cellular, AWS, PCS, public safety, audio/video broadcast, as well as customized applications such as air-to-ground antennas.

Broadband radio OEMs, carriers, and system integrators are among the largest purchasers of TIL-TEK's extensive product line.

TIL-TEK's manufacturing facility is in the Ottawa Valley town of Kemptville, Ontario. The company also has regional offices across North America, UK, and representation in Latin America.

TIL-TEK provides a complete line of base station, and remote antennas in frequencies from 400 MHz to 6 GHz.

TIL-TEK applications include: broadband point-to-point and point-to-multipoint systems, in-building, WIMAX, cellular, AWS, PCS, public safety, audio/video broadcast, as well as customized applications such as air-to-ground antennas.

TIL-TEK is also an ISO 9001:2000 registered company. This worldwide standard covers the entire operation of the company, from order entry to shipping, and from product design to production. All TIL-TEK products leave the plant having gone through a rigorous manufacturing process, with virtually 100 per cent on time deliveries.

Why Ottawa

TIL-TEK's Ottawa Valley home of Kemptville is located approximately 55 km south of Ottawa and 3 km south of the Rideau River. Many of the town's residents take advantage of the Rideau Canal Waterway, a boater's paradise that attracts pleasure boats from across North America to travel its 202 km length. The Rideau Canal is also a National Historic Site of Canada, a Canadian Heritage River and a UNESCO World Heritage Site.

TIL-TEK employees also take advantage of nearby Ottawa. The fourth-largest metropolitan area in Canada, Ottawa is a vibrant and growing community that prides itself on its exceptional quality of life. As Canada's capital, and seat of its federal government, Ottawa is a place steeped in history and tradition. But just as Ottawa honours its past, it also embraces its future. Indeed, over the past 50 years, confident and cosmopolitan Ottawa has successfully transformed itself into a global technology centre.

Ottawa plays host to over 60 festivals annually. The city's world class festival lineup includes: Winterlude, the Jazz Festival, North America's 2nd largest Bluesfest, the Dragon Boat Festival, the World's Largest International Chamber Music Festival, the 2nd Largest Hot Air Balloon Festival in North America, the World's Largest Tulip Festival, multiple fairs, and much more.

Together with its international stature and world class business environment, these winning attributes make Ottawa one of the best cities in the world in which to work, live, and play.

Business advantage

In partnering with TIL-TEK, customers take advantage of a company with extensive R&D expertise, a 30-plus year history in the delivery of off the shelf and customized antennas solutions, and an unmatched industry reputation for reliability.

Future growth plans

In March, 2010, Kavveri Telecom Products announced the signing of a major reseller distribution agreement with Sunnyvale, California's Moonblink Communications to carry the TIL-TEK Antennae Inc. full suite of products.

As a value-added dealer to VARS and Integrators, Moonblink provides for the wireless needs of all VARs and Integrators throughout the Americas. With a complete, end-to-end wireless product portfolio from the industry's leading manufacturers, Moonblink is a single wireless source for applications in enterprise, government, education, healthcare, security, public safety, and transportation markets.

Agreements were also signed in May/April 2010 with Var Networks and Milltech. VAR Networks is well positioned in the Israel market — they have provided services and components to telecom mobile operators and equipment manufacturers for over 8 years. Kavveri will partner with Milltech to enter the African market, where they will focus on Morocco and Algeria. Milltech, a leading telecom equipment and service provider to several key global original equipment manufacturers (OEMs), will use products from Kavveri's diverse portfolio. This exposure will help Kavveri expand their global market.
