## A Centre of Innovation

Widely lauded as Canada's focal point for advanced technology, Ottawa is a community of visionary entrepreneurs. With the highest level of research and development spending per capita in the country, Ottawa has become the home of leading economic clusters in security, telecommunications, software, semiconductors, photonics, life sciences and professional services. An economic powerhouse with a quality of life second to none. Ottawa is one of North America's fastest growing economies, and one of the world's most progressive centres of innovation.

## An Inspired and Inspiring Population

The people of Ottawa are the secret to its success. They're a prosperous population with a per capita income that's among the highest in Canada. They're also youthful, entrepreneurial, highly educated, and multilingual. In fact, cosmopolitan Ottawa prides itself on its ethnic diversity. The city continues to attract the best and brightest from all parts of the globe and has the second largest concentration of scientists and researchers in North America.

## An Invigorating Research and Academic Environment

To foster, fuel and sustain its achievement, Ottawa has a unique blend of private sector, university and government research institutions. Feeding the skill base, Ottawa has more than 400 elementary and secondary schools, eight universities, and colleges, and numerous professional and business schools. Our network of private and public laboratories support and incubate new ideas and initiatives. Through partnerships and collaborative efforts, this rich nucleus of focused educational and R&D resources has spawned an impressive record of innovation, asserting Ottawa's dynamic role on the global stage.
